# Introduction

Korea Pillar Packing Company Limited is the leading Korean manufacturer of sealing materials and systems. The company was established in 1978 with Nippon Pillar Packing Company Limited of Japan as a technical tie-up and joint venture partner.

Nippon Pillar has built-up more than ninety years of experience as a manufacturer of Gland Packings, Gaskets, Mechanical Seals and Flexible Disc Couplings and has gained an international reputation for technological achievement, quality and customer service. Korea Pillar utilizes the same advanced manufacturing technology and produces the same products as Nippon Pillar.

Korea Pillar has contributed to the development of key industries with the technology for "SEALING THE LEAKAGE OF FLUIDS." As a general manufacturer of sealing products, Korea Pillar's Products have been playing an important role in the heart of a wide range of equipment, such as home pumps which are used in everyday life as well as in the utility services.

Korea Pillar's products have been selected by major OEMs in Korea in the manufacturing sectors of valves, pumps, and other rotating equipments.

The company's Gland Packings, Mechanical Seals and Gaskets are widely used in the Thermal and Nuclear Power Station, Oil Refinery, Petrochemical, Chemical and Pharmaceutical plants, Iron and Steel works and Shipbuilding.

Korea Pillar is in the forefront of the development, application of new materials and technological advancement to further improve the performance of their products.

With the principle of "QUALITY FIRST, CO-OPERATION AND CONTINUOUS RESEARCH" as the cornerstone of the company's philosophy, it is fully expected that Korea Pillar will continue to satisfy our customer requirements by the application of new technologies and improving our service organization.
